SUMMARY OF QUALIFICATIONS

Computer Science student with hands-on experience building secure, scalable full-stack and data-driven applications, with strengths in backend systems, database design, authentication, and data analysis.

EDUCATION

Southeastern Louisiana University (SLU)

Hammond, Louisiana

Bachelor of Science in Computer Science (Concentration: Data Science)

May 2028

- Major GPA: 4.00/4.00 Honors Scholarship Award

LEADERSHIP & ACTIVITIES

Secretary, Google Developer Group (GDG) Southeastern Louisiana University

2026 – Present

Student Organization

Hammond, Louisiana

- Recorded meeting and event notes and distributed official communications to members.
- Assisted with organizing workshops and supporting event coordination as needed.

EXPERIENCE

Internet Resource Center – Student Web Developer

Sept 2025 – Present

Southeastern Louisiana University

Hammond, Louisiana

- Built Gemini-powered AI systems for PDF-based question answering and rubric-based grading, collaborating with faculty to iterate on system behavior and document findings.
- Presented research on web development with AI at the University of Louisiana at Lafayette URC (2025).

Software Intern

June 2025 – Dec 2025

IT Nepal Solution

Kathmandu, Nepal

- Contributed to the design and development of a responsive portfolio website for NAC Global Express using Django, focusing on clean UI, backend integration, and cross-device compatibility.
- Collaborated with team members to gather requirements, implement features, and ensure reliable performance across browsers.

Student Worker

May 2025 – Aug 2025

I/O Window, Southeastern Louisiana University

Hammond, Louisiana

- Assisted with campus network and server management and provided technical support to students and faculty.

PROJECTS

Visualizer | Python, Pandas, NumPy, Matplotlib, Streamlit

- Built a dynamic data analysis tool that processes arbitrary CSV and PKL files to perform vector operations, probability computations, and correlation analysis with interactive Streamlit visualizations.

ScholarSpace | TypeScript, C#, .NET, SQL Server

- Developed a student community web app with blog posts and threaded discussions using a .NET backend and relational data storage.

Chatty! | React, Vite, MongoDB

- Built a full-stack real-time chat application with secure authentication, one-to-one messaging, media sharing, and friend requests.

ClipDrop | JavaScript, Manifest V3

- Built a privacy-first browser clipboard extension with session-only storage, enabling multi-snippet copy and paste without accounts, backends, or persistent data.

TECHNICAL SKILLS

Python, Django, C, C#, TypeScript, Java — Pandas, NumPy — AI & ML Systems — SQL Server, Oracle, MongoDB — React, .NET — Git, GitHub, Visual Studio, WordPress — HTML, CSS
