SUMMARY OF QUALIFICATIONS

Computer Science student with hands-on experience building backend and web-based applications and structured data workflows. Strengths include backend logic, database design, authentication systems, and reliable debugging of research-oriented tools.

EDUCATION

Southeastern Louisiana University (SLU) Hammond, Louisiana
Bachelor of Science in Computer Science (Concentration: Data Science) May 2028
– Major GPA: 4.00/4.00 Honors Scholarship Award

LEADERSHIP & ACTIVITIES

Secretary, Google Developer Group (GDG) Southeastern Louisiana University 2026 – Present
Student Organization Hammond, Louisiana
– Recorded meeting and event notes and distributed official communications to members.
– Assisted with organizing workshops and supporting event coordination as needed.

EXPERIENCE

Internet Resource Center – Student Web Developer Sept 2025 – Present
Southeastern Louisiana University Hammond, Louisiana
– Developed research-oriented document processing tools for PDF-based question answering and rubric based grading.
– Improved backend logic and system behavior through iterative testing, debugging, and documented findings.
– Presented research on web development with AI at the University of Louisiana at Lafayette URC (2025).

Software Intern June 2025 – Dec 2025
IT Nepal Solution Kathmandu, Nepal
– Contributed to a responsive portfolio website for NAC Global Express, focusing on clean UI and cross-device compatibility.
– Collaborated with team members to gather requirements, implement features, and ensure reliable browser performance.

Student Worker May 2025 – Aug 2025
I/O Window, Southeastern Louisiana University Hammond, Louisiana
– Provided technical support to students and faculty and assisted with campus network operations.

PROJECTS

Visualizer | Python, Pandas, NumPy, Matplotlib, Streamlit, Docker
– Built a data analysis tool that processes CSV and PKL files to perform vector operations and statistical analysis with interactive visualizations.
– Containerized the application using Docker for reproducible local development and execution.

ScholarSpace | TypeScript, C#, .NET, SQL Server
– Developed a web application with blog posts and threaded discussions using a .NET backend and relational data storage.

Chatty! | React, Vite, MongoDB
– Developed a web-based messaging application with authentication and persistent data storage.

ClipDrop | JavaScript, Manifest V3
– Built a browser clipboard extension enabling multi-snippet copy and paste without accounts or persistent backend storage.

TECHNICAL SKILLS

Docker, Git, GitHub — Python, C, C#, TypeScript, Java, PHP — SQL Server, Oracle, MongoDB — React, .NET — HTML, CSS
